## **Network Fitness launch new concept Treadmill**

Filed in Healthcare on December 29, 2009

Network Fitness Supplies Ireland are pleased to announce the launch of the new BH Fitness Pioneer K30 Treadmill which features the A-Wings system which is a new concept and is the future of all treadmill design, which is unique to BH fitness.

The treadmill has an extra wide running belt which would normally add significant cost to the unit, however the wing system allows the belt to run right out to the edges of the frame. For safety an additional pair of small foot brackets (Wings) are bolted to the frame. This allows users to stand on the sides of the belt before running on the treadmill, but doesn't add to the size of the unit or cost as the frame doesn't need to be enlarged. The treadmill also has a unique Plug & Run system. The system means that the unit is very simple to build as you just unfold and add a few minor touches. A similar treadmill to this last year would have cost around EUR1,100, but now the Pioneer K30 treadmill will only set you back EUR899! An unbelievable price for a treadmill with so many features including a 51cm wide running belt! BH fitness have now added a 10 year warranty to the motor too! For more on all the features on this and many more treadmills visit [www.networkfitness.ie/treadmills.html](http://www.networkfitness.ie/treadmills.html)
