

# New Service Solves "Private Number" Frustration for Millions of Mobile Users in Ireland.

*All Mobile users get calls from "Private", "Withheld" or "Unknown" numbers. [www.privatenumbers.ie](http://www.privatenumbers.ie), separates the Good calls from Nuisance callers instantly.*

A Dublin based business, DialFX Limited, has announced details of an innovative new "Private Number" unblocking service for mobile phone users.

The new service will provide mobile phone users with a secure solution which can retrieve incoming "Private" or "Withheld" phone numbers originating from any landline or mobile.

Up to now, the only method of tracking a "Private Number" caller was to make a nuisance complaint, applying only to extraordinary circumstances.

A nuisance complaint is not appropriate for the many thousands of frustrated call recipients, who have to contend with anonymous calls daily.

Now, PrivateNumbers.ie has developed a mechanism to reveal "Private" or "Withheld" numbers on request.

The service is both secure and protected. Users and third parties personal information and data remains secure at all times.

This new service is a world first and is exclusively available from [www.privatenumbers.ie](http://www.privatenumbers.ie)

Commenting on the new service, Tony Kelly, from DialFX Limited said, "We have developed a remarkable system which will be useful to all mobile phone users.

Many people no longer answer "Private Number" calls, while some callers don't realise their number is being withheld. It's a circle of frustration, which can now be broken.
